Amendments to the Specification:

Kindly amend the paragraph beginning on the last line of page 25 as follows:

In the example below, TEST computes if the specified attribute is a color. If so, the

function COLORIZE-OBJECT is called to change [[its]] the object's color. FIND-COLOR-

VALUES identifies if the color is defined in a database of colors.

```
(define-depiction (:attribute nil)
    :test (find-color-values descriptor-name)
    :fobjects (list object)
    :fdepict (loop for i in (listify object)
        do (colorize-object i descriptor-name)))
```
